I'm an HTML/CSS developer with over 4 years of experience, including 2 years in commercial projects. I create responsive, cross-browser layouts using HTML5, CSS3, SCSS, JavaScript, Flexbox, Grid, the BEM methodology, and Bootstrap. I work with Gulp and Git as part of my workflow. I focus on clean code, fast-loading pages, and great appearance on any screen. I'm a team player, responsible with deadlines, and always open to learning new things. You can check out my work here: aleks-tl.github.io/portfolio
